May 22

The Citizens of the City of Elba Invite You to Be Present at the Formal Opening and Dedication of the

JOHN B. SIMMONS MEMORIAL BRIDGE

Thursday Afternoon, May 22, 1930, at 3 P. M.

Important Event In Elba's History

THURSDAY, MAY 22, will be another date long to be remembered by people of Elba, this date at 3:00 P. M. having been chosen for the formal opening of the fine new concrete bridge over Pea River here. This new bridge replaces the steel structure which was completely destroyed on March 14, 1929, during the flood, after having served the people of this

In appreciation of the new bridge and what it will mean to Elba, a very fitting program is being arranged for the formal opening and dedication on next Thursday afternoon.

Governor Graves On Program Governor Bibb Graves has accepted an invitation to be present and deliver an address, as well as Colonel Woolsey Finnell, Chairman of the State Highway Commission, and other State officials. Judge M. S. Carmichael is also expect-

ed to be on the program for the occasion. The structure will be christened "The John B. Simmons Memorial Bridge" in honor of that well known and much beloved citizen, Hon. J. B. Simmons, who spent the greater part

of his life here in building up the town and who was one of its earliest settlers.

Great Gathering Of Singers

Another interesting feature of the day's exercises will be the assembling of one of the largest vocal classes ever gotten together in Southeast Alabama, and this class promises some excellent music, including a number of selections from the popular Sacred Harp.

"NOT SO DUMB"

Alabama Power Building

Birmingham, Alabama

Alabama's Matchless **Resources**

This structure — home of Alabama Power Company in Birmingham — is an imposing monument to Alabama's matchless resources.

All the principal materials in this imposing structure, rated as one of the three most beautiful utility buildings in the world, came from Alabama -- within a radius of sixty miles of the building site. Such required materials as were not made in Alabama, were bought thru firms maintaining sales offices in

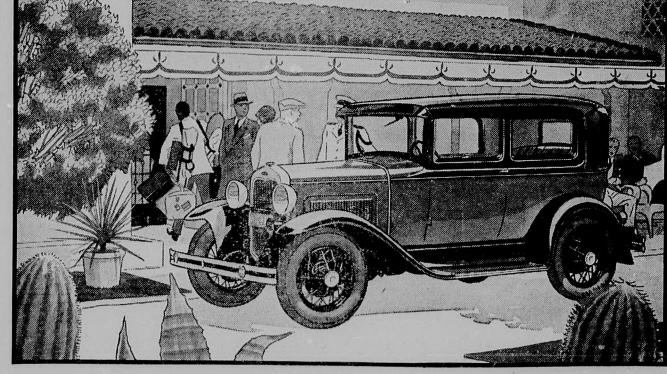

No other like area in the whole world could have provided the complete array of building materials used in this structure. Here are some of them, all made from Alabama's own natural resources: Structural Steel, Limestone, Marble, Brick, Building Tile, Cast Iron Pipe, Cement, Steam Radiators, Lime and Pine

For years to come this building will exemplify the durability and beauty of the products of our state and stand as a silent challenge to all Alabamians to buy Alabama products and materials wherever possible.
